

CLIENTS & PROPERTY MANAGERS

Client Board Quick-Start Guide

Your live board shows every piece of work at your properties.

1

Open your board link and sign in

Use the board link from your HALO team. Admins can invite teammates and set each person's permissions from the Access page.

2

Read the board at a glance

Each card is one piece of work. Lanes show progress left to right — new, in progress, and done. Cards update live as the field team works.

3

Tap a card for the full story

Details, photos, invoices, and a message thread live on every card. Reply on the card and the office sees it immediately.

4

Pay right from the card

Cards with an invoice show a Pay button — review the invoice and pay in a few taps. Receipts stay attached to the card.

5

Request new work from your board

Send a maintenance or work request without leaving the board — it becomes a card the office triages right away.

6

See your properties on the Units map

The Units and Map pages color-code every unit's status, and the Hub collects documents and updates in one place.

7

Look back with History

Finished cards auto-archive to History after completion. Search past work anytime or export it all to CSV.

WEEKLY RHYTHM

Scan the board → Reply on cards → Approve & pay invoices → Request new work → Review History
