

OFFICE TEAM

Office Quick-Start Guide

Run the whole operation from the HALO app — phone or desktop.

1

Unlock HALO and start on Today

Enter the office passcode to sign in. The Today feed is your morning briefing: blockers, margin alerts, jobs that lost a crew, and anything needing a decision.

2

Create and staff jobs in one step

Use Quick Job to create a job and assign the crew in one sheet — or broadcast it to the job board and let the first crew claim it.

3

Dispatch and track the day

The dispatch board moves a job's crew, date, and status together. Every job card shows its 5-stage timeline from scheduled to closed out.

4

Keep money tied to jobs

Every invoice links to a job card. Send invoices with a pay link, and watch payments land on the Money summary.

5

Scan checks into the filing cabinet

Money → Scan Check reads the check photo, records the payment against an invoice, and files the image in the searchable Check Files archive.

6

Message crews — and ping in emergencies

Chat with crews (attachments included) from the crew command center. Use the emergency ping to text every crew for urgent same-day work.

7

Close out clean

The close-out checklist won't let a job clear until the crew is paid, the client invoice is paid, and the recap summary is sent.

DAILY RHYTHM

AM: Today feed → Dispatch crews → Midday: crew messages & photos → PM: invoices & checks → Close out finished jobs
